

### Specific directions for NPC- installation to AWEK C-POS cash system „C-POS cash-LX“

Each point-of-sale with the installed and activated service to transfer transaction data via the network sends booking data such as **Broadcast** via the LAN (Local Area Network, in this case network of points-of-sale). Whether the desired point-of-sale has the necessary service of software requirements at its disposal should be cleared with or requested from the supplier responsible for the points-of-sale..

#### Configuration NPC:

The NPC has to be programmed with the protocol ,awek.npc'.

The IP-address has to be set in accordance with a free/ unused IP- address of the local network.

The Port number should be fixed on #9877 !

The Pos-no has to be equal to the register number of the desired cash register (compare to the register number on the operator screen!). In case of Pos-no = 00 the data off all registers will be transmitted).
